

# Vision

The vision of Krishi Vigyan Kendra, Vaishali is to use science and technology to increase agriculture's productivity, profitability, and sustainability.

**KVK works to achieve this vision by:**

❖ **Transferring technology**

KVKs work to reduce the time lag between research institutions generating technology and farmers using it in their fields. They do this by conducting on-farm trials, demonstrating new technologies, and providing advisory services.

❖ **Capacity building**

KVKs offer training programs to farmers, extension personnel, agripreneurs, rural youth, and women in agriculture. These programs help people develop skills and start their own businesses.

❖ **Rural development**

KVKs organize activities for school children like awareness camps, Trainings are also provided like Rural Youth, Farmer and Farm Women Training, Skill Development Training

❖ **Collaboration**

KVKs collaborate with other stakeholders, such as agricultural universities, research institutions, government departments, NGOs, and local communities
