

## **Nadep Compost and Vermi Compost Units are a Big Substitute of Village waste Management**

---

**By KVK Shahjahanpur**

**Post Niyamatpur, Pincode- 242001, Mob. No. 9450417136**

### **Initiative taken by KVK**

The farmers of the district were made aware to use the crop waste and dairy waste to make Valuable Nadep compost and Vermi-compost . The farmer are being trained at KVK demonstration unit of Nadep compost and Vermi-compost . The technology is being made popular among farmer by training , demonstration , farmer's fair / gosthi , kisan mela , print and electronic media.

### **Impact/Major Changes**

The farmers are making vermi-compost and nadep compost and using it in farming and also getting extra income by selling compost and vermin culture (vermi-worms )to other farmers .

The scientist of KVK promoted and disseminated the technology of Nadep and vermi pit making . Now **240** farmers of **80** villages of district have adopted the technology .

### **Brief Success story of a contact farmer**

A progressive farmer , Shri Gyanesh Tiwari S/O Shri Janki Prasad of village Navipur Post Hathgawan Block Nigohi District Shahjahanpur has been trained by KVK for making Nadep compost and Vermi-compost . He was very much impressed by seeing Nadep compost and Vermi-compost demonstration units at KVK . He is running a big dairy unit at his village Navipur and now he is making vermin compost with dairy waste. In his vermi compost unit , there are 110 beds of size 30\*3\*1 ft. and 30 beds of size 15\*3\*1 ft . He used to fill the beds 3-4 times in a year and produce 4000 to 4500 quintal vermi compost and 250 -300kg vermi culture (vermi –worms). The district officials and farmers used to visit their dairy farm and vermi compost unit and are being inspired by it. He is getting an annual income of Rs 2.75 to 3 lac. from these units.
